CapCut

PROJECTS

WeatherSense (Mobile App)

Developed a real-time weather forecast app providing temperature, weather conditions, and location-based search using React Native (Expo) and OpenWeatherMap API.

Cinnamon Master (Mobile App)

Developing an app for cinnamon export knowledge and trade facilitation

Ella Flower Garden Resort - UI/UX Design

Designed a mobile app interface for a hotel management system

FHSS Student Portal APP

Created a Figma prototype for a student portal as a university project

Machine Learning Diabetes Prediction Model

Built an AI-based model for diabetes risk prediction

Power BI Dashboard Interface

Designed an interactive Power BI dashboard for data visualization and analytics

Stock Prediction Web App

Built a real-time stock prediction and classification web app using Python (Streamlit) and deep learning models (MLP, RNN, and LSTM), with real-time data fetched from Yahoo Finance.

Movie Explorer Web App - UI/UX Design

Presenting a Figma-based UI/UX design for a modern Movie Explorer web application.
